Engineering measures:Use of adequate ventilation should be sufficient to control<br/>worker exposure to airborne contaminants. If the use of this<br/>product generates dust, fumes, gas, vapor or mist, use pro-<br/>cess enclosures, local exhaust ventilation or other engineer-<br/>ing controls to keep worker exposure below any recom-<br/>mended or statutory limits.Personal protective equipment

| Respiratory protection | : | Use a properly fitted NIOSH approved air-purifying or air-fed respirator complying with an approved standard if a risk as-<br>sessment indicates this is necessary.   |
|------------------------|---|---|
|                        |   | The filter class for the respirator must be suitable for the max-<br>imum expected contaminant concentration (gas/vapor/aero-<br>sol/particulates) that may arise when handling the product. If<br>this concentration is exceeded, self-contained breathing ap- |

paratus must be used.

| Hand protection          | : | Chemical-resistant, impervious gloves complying with an ap-<br>proved standard should be worn at all times when handling<br>chemical products if a risk assessment indicates this is nec-<br>essary.   |
| Eye protection           | : | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary.  |
| Skin and body protection | : | Choose body protection in relation to its type, to the concen-<br>tration and amount of dangerous substances, and to the spe-<br>cific work-place.   |
| Hygiene measures         | : | Avoid contact with skin, eyes and clothing.<br>Wash hands before breaks and immediately after handling<br>the product.<br>Remove contaminated clothing and protective equipment be-<br>fore entering eating areas.<br>Wash thoroughly after handling.<br>Avoid breathing dust. |
