SIKA TRANSITIONS TO SIKAFLEX®-2C NS EZ MIX+

Lyndhurst, August 20, 2024

Dear Valued Customer,

We are extremely excited to communicate the introduction of Sikaflex®-2c NS EZ Mix+ and how over the coming months the transition from the current Sikaflex®-2c NS EZ Mix is expected to play out. This will take a little time and we appreciate your patience during this process.

The Sikaflex®-2c NS EZ Mix+ is improved with respect to performance AND application ease. The product is a true CLASS 50 sealant to support specifications, it's SWRI validated, it can be used in potable water applications (NSF 61/ NSF 600) and fire rated joint assemblies – as well as being much easier to mix! WIN – WIN – WIN!! We look forward to bringing you another product innovation from Sika.

The estimated transition is shown below. When we deplete packaging and finished good inventory for each item, we will start the process of moving orders to the associated EZ Mix+ sku. This means at some point during the transition you may get a mixed shipment of EZ Mix and EZ Mix+. Please find attached letter to support any projects that may need help in a substitution.

Product	Existing code:	Timing of transition to EZ Mix+
Sikaflex®-2c NS EZ Mix Limestone 1.5 Gal	(187658)	Happening now (597471)
Sikaflex®-2c NS EZ Mix Tint Base 1.5 Gal	(187657)	Q4 2024 (**597473)
Sikaflex®-2c NS EZ Mix Limestone 3 Gal	(187655)	Q4 2024 (**597472)
Sikaflex®-2c NS EZ Mix Tint Base 3 Gal	(187654)	Q4 2024 (**597474)

** Product codes provided to support any set up requirements in your business platform. These can also be found in the price list. See important note below.

Please immediately start ordering Sikaflex®-2c NS EZ Mix+ Limestone 1.5 Gal (597471). Continue to place orders for all other EZ Mix items using existing product codes. Once we are fully transitioned for each item, we will communicate this to you, and you can then start using new EZ Mix+ product codes on all your orders.

DATE: August 20, 2024

Attached you will find the Product Data Sheet along with a letter directed to Specifiers to help you substitute Sikaflex®-2c NS EZ Mix+ on projects as needed. If you need further assistance on any projects, please reach out to your local Sika contact or you can call me directly.

Finally, some important technical information to be aware of: **The Sikaflex®-2c EZ Mix Booster and the Sikaflex®-2c NS TG do NOT work with the Sikaflex®-2c NS EZ Mix+.** We will continue to supply Booster and TG additive to go along with the regular EZ Mix on existing projects. We are working on a new TG additive to go along with the Sikaflex®-2c NS EZ Mix+.

Thank you again for your patience and I'm looking forward to help make sure this is an easy and seamless transition. If you have any questions, do not hesitate to reach out to me directly at my contact information above.

Best Regards,

Florian Doebbel
