SIKA'S SUSTAINABILITY COMMITMENT
As a global company, Sika is committed to sustainable development through continuous measuring, improving, reporting and communicating sustainable data. Sika USA, has adopted a similar approach to Sika's commitment to maximize the value of our products and contribute to all stakeholders while reducing risks and resource consumption.

Sika pursues an strategic target areas, focusing on sustainable operations, climate performance, community engagement, safety, water/energy and innovation areas. Through its products, systems and solutions, Sika strives to create long-term benefits and added value for all stakeholders and significantly reduce resource consumption and the impacts associated with production processes.

Green Building Initiatives and Certification Systems
With its EPDs, assess the sustainable performance of building materials and the performance of the entire building, such as reduction of growing importance and are consequently increasing the market demand for construction products. Sika is actively participating in these initiatives and programs.

Sika's detailed information on how Sika utilizes inherent sustainable construction, reduce CO₂ emissions and help save energy, use renewable water while meeting sustainable building standards can be found at: <https://www.us.sika.com/sustainability>

ASPA
Samafil BUILDING TRUST Sika

Sika strives to measure, improve, and communicate the environmental impact of our products.

By developing Environmental Product Declarations (EPDs) and performing

Life Cycle Analysis studies, we can disclose the environmental impacts of a product while taking into consideration the full lifecycle.

Specifically, EPDs publish the Global Warming Potential (GWP), a measurement of the product's direct contribution to climate change.

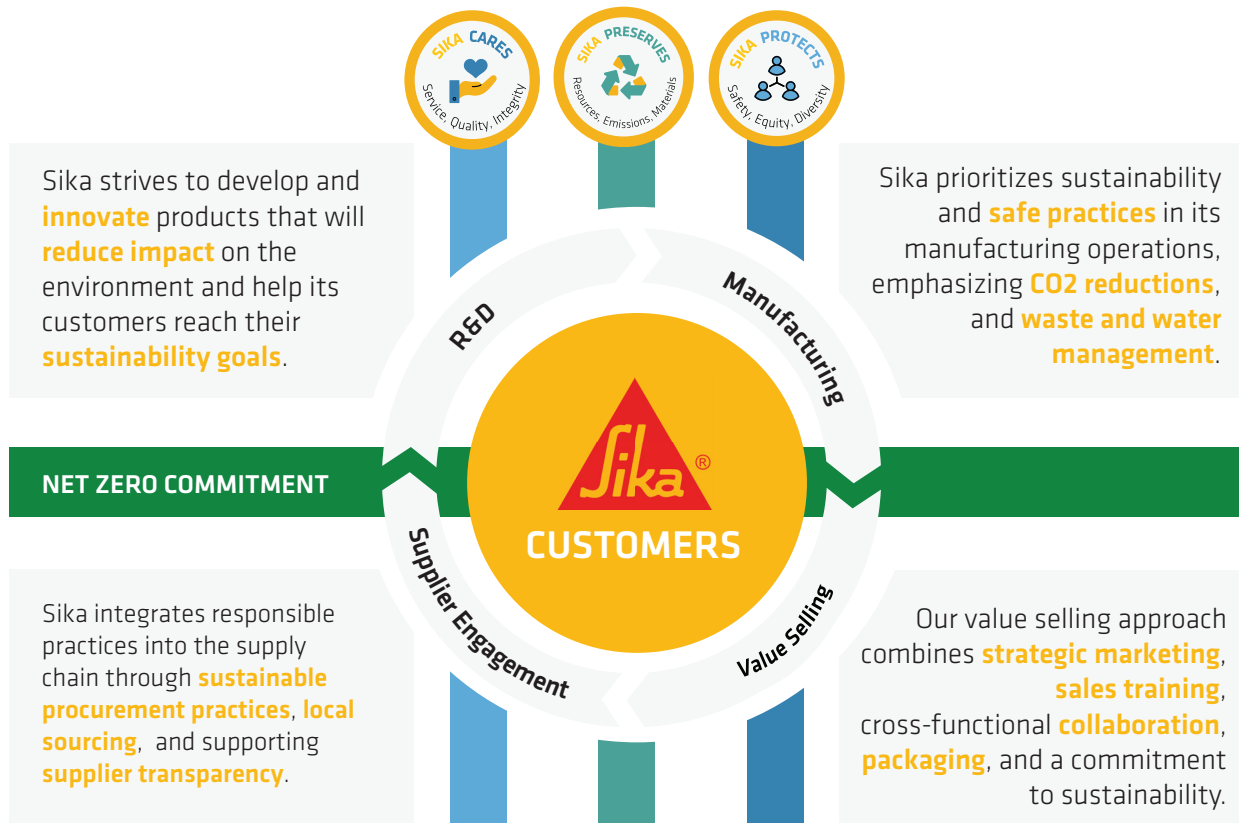

This value can be used to make comparisons and enables the use of lower embodied emissions in construction materials. Sika has published a number of Type III product-specific EPDs.

SIKA USA'S SUSTAINABILITY STRATEGY

Sika USA strives to build a better future by committing to maximizing the value of our solutions and contributions to all stakeholders while reducing risks and resource consumption.

OUR NET ZERO COMMITMENT

Sika supports the Science-Based Target Initiative (SBTi) and has pledged to reach net zero by no later than 2050. By doing so, Sika recognizes the crucial role companies can play in minimizing the risk climate change poses to the future of our planet.

Sika is a member in the U.S. DOE's Better Climate Challenge, committing to reducing GHG emissions by 50% and energy consumption by 10% within 10 years.

Scope 1 & 2

- 25% by 2032 (1.5 °C aligned)
- 90% by 2050 (1.5 °C aligned)

Scope 3

- 42% by 2032 (2 °C aligned)
- 90% by 2050 (1.5 °C aligned)
